Evaluations: C-3

Date of Review: 10 February 1952

Source: From #1 ☐ Greek source.

**THIS IS UNEVALUATED INFORMATION**

1. Khafer Deva came to Greece in order to counteract the work of the Yugoslav government in setting up the pro-Yugoslav Prison Committee. He came to Greece to warn the Albanians here of the risk the Albanian cause is running because of the Yugoslav actions. He says the danger to the Albanian cause is so much the worse because the Americans, who are interested in the fall of the Hacha regime, have left Tito with a free hand. Tito is using the slogan of "Albanian integrity", and is encouraging the Albanians to oppose the claims of the Greeks.
2. Deva has stated that every move directed toward Albania, even the reorganization of the Free Albania Committee, must originate from Greek initiative. Even the persons who are assigned to the Free Albania Committee to broaden it must have the confidence of the Greeks and must be well known to the Albanian people. In order that Greece has a vote on the Albanian issue, Greece must show greater interest. Every move must have Greece as a starting point, and only Greece is entitled to have immediate interest.

**Field Comment:** Deva, former Minister of Interior in Albania, arrived in Greece from Italy 26 January 1952. Deva, a Kon-Gov, states that he does not belong to any political party. Source, however, believes that he is collaborating with Ali Khasari. Deva brought a letter from Khasari to the latter's friends in Greece.
